SEMINOLE FEED® EQUI-14 PELLET

FEEDING DIRECTIONS

Do not feed Seminole Feed® Equi-14 Pellet on a free choice basis. Feed at regular times, with two or more equal feedings per day. Make all feed changes gradually, over a 7 - 10 day period. Increases in feeding rate should not exceed 1 pound per day for an individual horse. Delay feeding a horse that has just been exercised or is exhibiting pain, fever or diarrhea. Seminole Feed® Equi-14 Pellet weighs approximately 1.6 pounds per dry US quart. Feed hay and/or equivalent pasture at the rate of 1 to 2 pounds of body weight daily. Provide a free-choice horse mineral such as Seminole Grass Balancer 16:8 Mineral or Alfa Balancer 12:12 Mineral on a continuous basis. Provide clean, fresh water at all times.
