#### FEEDING DIRECTIONS

Universal is not a complete feed and must be fed with pasture and/or hay. Feed at the rate of ½ to 2½ pounds per 100 pounds of body weight daily to growing, mature or finishing cattle. Adjust feeding rate to provide for satisfactory growth rate or body condition. When consumed in recommended amounts, this product will supply adequate minerals for the average animal. However, as mineral needs of individual cattle vary, it is recommended that Seminole's Special Cow Mineral be fed on a free-choice basis.
