SUPPLIES OPTIMAL NUTRITION	PROPER GROWTH & DEVELOPMENT OF FOALS, INCREASED MILK PRODUCTION OF MARES, ENHANCED ENERGY LEVEL & BODY CONDITION OF PERFORMANCE HORSES
ALL-INCLUSIVE FORMULA	NO OTHER GRAINS OR SUPPLEMENTS ARE NEEDED FOR NURSING OR ORPHAN FOALS

FEEDING DIRECTIONS

Nursing Foals: Feed 1 pound of Foal Balancer Milk Pellets per 100 pounds of body weight daily starting at one week of age and continue until weaning.

Orphan or Early Weaned Foals: Feed 2 pounds of Foal Balancer Milk Pellets per 100 pounds of body weight daily and continue until weaning. Start weaning foals at 3 months of age.

Weanlings: Feed 2 pounds of Foal Balancer Milk Pellets daily, and begin adding ¼ pound per day of 14% protein feed in addition to Foal Balancer Milk Pellets. Continue adding ¼ pound of 14% protein feed each day so after 12 days the foal will be consuming 2 pounds of milk pellets and 3 pounds of 14% protein feed daily. Continue to feed 2 pounds of Foal Balancer Milk Pellets daily along with enough 14% protein feed to support adequate growth and condition until at least 6 months of age. Foal Balancer Milk Pellets may be fed at 2 pounds per day along with 14% protein feed until 12 months of age.

Lactating Mares: From 30 days before foaling until foals are 3 to 4 months of age, feed 1 pound of Foal Balancer Milk Pellets as a supplement to the daily ration.

Long Yearlings to Two Year Old Horses/Performance or Intense Race Training: Feed 2 pounds of Foal Balancer Milk Pellets as a supplement to the daily ration.

Two Year Old to Mature Horses/Performance or Intense Race Training: Feed 1 pound of Foal Balancer Milk Pellets as a supplement to the daily ration.
