CONCENTRATED SOURCE OF VITAMINS & MINERALS	ECONOMICAL TO FEED, TWO OUNCES COSTS ONLY \$0.05 PER DAY

FEEDING DIRECTIONS

Grass Balancer 16:8 Horse Mineral Block is a convenient way to provide your horse with a balanced mineral and vitamin source to complement a grass roughage (hay or pasture) feeding program. Place Grass Balancer 16:8 Horse Mineral Block in the stall or out on pasture. Provide one block for every four head when horses are pastured together. Locate blocks near water sources and protect from heavy rain by placing block in a covered feeder. Provide blocks on a continuous basis. Consumption of mineral will vary due to individual appetite, size, age and condition of horse, amount and quality of hay and pasture available, amount of grain fed, season, environmental conditions, activity of horse, and other mineral availability. If consumption of Grass Balancer 16:8 Horse Mineral Block exceeds 4 ounces per horse per day, move self-feeder away from water source and/or offer free-choice salt in block or granular form in addition to Grass Balancer 16:8 Horse Mineral Block.
