Seminole Feed® Leisure

Feeding Directions

Seminole Feed® Leisure is a pelleted feed for adult horses to be fed along with good quality hay and/or pasture. Start the feeding program using the Daily Feeding Guide for the type of roughage fed and class of horse. After observing and/or weighing the horse for a period of time, increase or decrease the daily feeding rate to obtain the desired body condition or body weight.

Do not feed Seminole Feed® Leisure on a free choice basis. Feed at regular times, with two or more equal feedings per day. Make all feed changes gradually, over a 7 - 10 day period. Increases in feeding rate should not exceed 1 pound per day for an individual horse. Delay feeding a horse that has just been exercised or is exhibiting pain, fever or diarrhea. Seminole Feed® Leisure weighs approximately 1.5 pounds per dry US quart. Feed hay and/or equivalent pasture at the rate of 1 to 2 pounds per 100 pounds of body weight daily. Provide a free-choice horse mineral such as Seminole Grass Balancer 16:8 Mineral or Alfa Balancer 12:12 Mineral on a continuous basis. Provide clean, fresh water at all times.
