Wellness GROW RIGHT®

FEEDING DIRECTIONS

Wellness GROW RIGHT® is a premium low-starch, textured feed for growing horses, foals, gestating & lactating mares and performance horses. Wellness GROW RIGHT® should be fed along with good quality hay and/or pasture. Start the feeding program using the Daily Feeding Guide for the type of roughage fed and class of horse. After observing and/or weighing the horse for a period of time, increase or decrease the daily feeding rate to obtain the desired body condition or body weight.

Do not feed Wellness GROW RIGHT® on a free choice basis. Feed at regular times, with two or more equal feedings per day. Make all feed changes gradually, over a 7-10 day period. Increases in feeding rate should not exceed 1 pound per day for an individual horse. Delay feeding a horse that has been exercised or is exhibiting pain, fever or diarrhea. Wellness GROW RIGHT® weighs approximately 1.6 pounds per dry US quart. Feed hay and/or equivalent pasture at the rate of 1 to 2 pounds per 100 pounds of body weight daily. Provide a free choice horse mineral such as Seminole Grass Balancer 16:8 Mineral or Alfa Balancer 12:12 Mineral on continuous basis. Provide clean, fresh water at all times.

DAILY FEEDING GUIDE

Recommended Daily Feeding Rate in pounds of feed per 100 pounds of body weight or as a percentage of body weight (BW).
